

SYMONS STEEL-PLY

The Steel-Ply forming system is a pre-engineered, factory-built, reusable concrete forming system. It may be used in handset or gang form applications, for commercial or residential structures. The Steel-Ply forming system can form walls of almost any shape or size, with accessories for special structures and details. This system is more productive and economical than job-built plywood formwork or other forming methods

KEY SYSTEM FEATURES:

Can be use as lightweight Handset or ganged and set by crane.

- Efficient and Easy to use – minimal tools and training required.
- Reduces or eliminates the need for job-built formwork.
- Same basic components regardless of application.
- Modular panels sizes to achieve any dimension.
- Easily stackable to greater than 20'.
- 1000 psf pour pressure.

IDEAL SYSTEM FOR:

- Residential Foundations and Shearwalls
- Commercial Foundations and frost walls
- Pad footings
- Loading bays and docks
- Pier and Column construction
- Bridge Abutments
- Elevator Cores
- Culverts
